

Inspection Report

Meharry Medical College
1005 D.B. Todd Jr Boulevard, Ani Care Fac
Nashville, TN 37208

Customer ID: **851**
Certificate: **63-R-0002**
Site: 001
ANIMAL CARE FACILITY

Type: ROUTINE INSPECTION
Date: 21-FEB-2018

3.25(c)

FACILITIES, GENERAL.

The cool room used to store unopened bags of feed including the guinea pig feed had a musty moldy odor. White chips and residue of ceiling material were noted on the floor. A black moldy substance was noted on the ceiling in the back right corner of the storage room. The unopened bags of guinea pig feed felt damp to the touch. Damp feed may become contaminated and may no longer be nutritious. Ensure that the feed storage room is kept in a condition that adequately protects food supplies against storage and deterioration. Correct by 2/22/18.

This inspection was conducted with undersigned Attending Veterinarian and an APHIS-IES representative. The exit interview was conducted with undersigned Attending Veterinarian, IACUC Regulatory Review Administrator and an APHIS-IES representative.
